Port Moody

Chateau Place Road Restoration and Paving Work

Evergreen Line crews will begin restoration of the Chateau Place roadway and parking lot starting the week of August 17. Crews will be reconstructing the roadway and parking lot from the sidewalk to the curb at the south end of Chateau Place (the approximate area will be where the fencing and work site was set-up in late 2014).

Paving requires warm, dry weather conditions, so this work is weather dependent. Crews may start and stop work as weather permits and therefore the schedule is subject to change.

WHAT TO EXPECT

- Crews will begin work the week of August 17 from 7 a.m. to 5 p.m. and work will take approximately one week to 10 days to complete. Residents will be notified if further work is required.
- Crews will be removing the existing asphalt in the roadway and parking lot and adding granular fill and compacting this material as needed.
- Once the fill has been placed, crews will pave and repaint the parking lot lines. Milling may be required in some areas.
- In order to complete the restoration of the roadway and parking lot, there will be temporary parking restrictions for some residents. You will be contacted directly if your parking spot is impacted and alternative parking will be made available.
- Access to the south end of Chateau Place by car will not be available while this work is underway.
- Chateau Place residents can expect construction-related noise, including the use of heavy equipment and material hauling. Crews will minimize the use of back-up beepers, however they are required for safety.
- Every effort will be made to minimize noise and disruption and to complete this work as soon as possible.

Thank you again for your continued patience and understanding while we work to complete the restoration of Chateau Place. If you have any questions or concerns, please contact the Traffic Information Line at 604-927-2080, available 24 hours a day, seven days a week.

ABOUT EGRT CONSTRUCTION

EGRT Construction has been awarded the contract to design and build the Evergreen Line.
