

STATION UPDATES

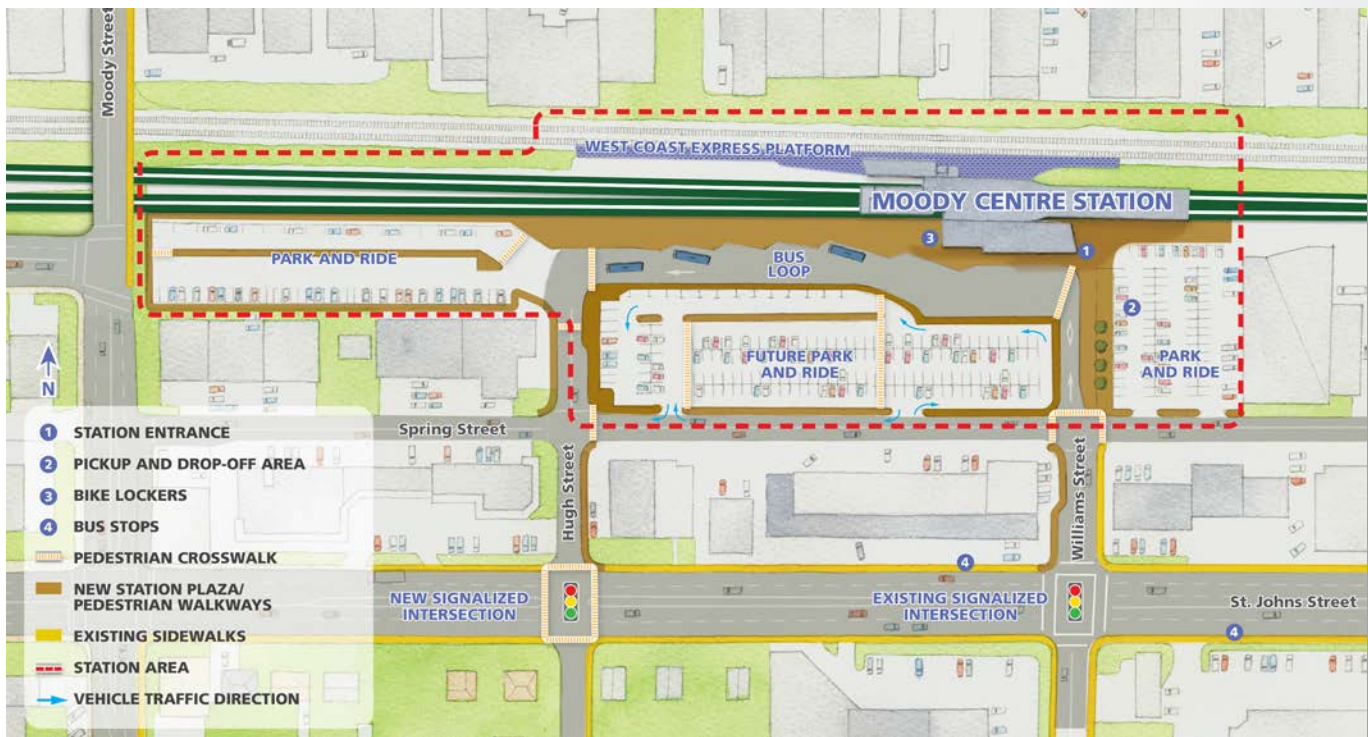

# Moody Centre Station

Connecting West Coast Express (WCE) and the Evergreen Line, Moody Centre Station will provide a central location for transit connections with the Coast Mountain bus exchange and Park and Ride facilities.

Moody Centre Station is located at ground level along the railway corridor, between Moody Street and Williams Street. Situated in Moody Centre, the station will serve the local businesses, residents, Rocky Point Park and the Port Moody waterfront area.

The station design allows passengers to access both the Evergreen Line and the West Coast Express platforms and to transfer conveniently between the WCE and the Evergreen Line, significantly expanding destination options for WCE commuters. The open-concept design will help passengers easily move through the station. Extensive glass in the station will create a safe environment, as passengers will be visible.

Outside the station, the plaza area will be landscaped and a pedestrian corridor will connect to Spring Street. A pedestrian path will link the station to the Moody Street Overpass, providing access over the railway tracks to the waterfront.

Site context plan for completed Moody Centre Station

Moody Centre will have an expanded bus exchange to accommodate eight bus bays, providing better bus connection to Port Moody communities. A HandyDART stop will be located adjacent to the station entrance. Cyclists will be able to store their bikes in bike lockers and bike racks at the station plaza area. Vehicles will also be able to pick-up and drop-off passengers in designated spaces near the station entrance.

An expanded Park and Ride parking lot will be constructed along Spring Street, connecting the two lots currently on Williams Street and Hugh Street. This new Park and Ride will provide approximately 85 additional parking stalls at Moody Centre Station, for a total of approximately 400 parking stalls.

### **What is the Evergreen Line?**

The Evergreen Line project is an 11-kilometre extension to the existing SkyTrain system in Metro Vancouver. It will be a fast, frequent and convenient SkyTrain service, connecting Coquitlam City Centre through Port Moody to Lougheed Town Centre in approximately 15 minutes. It will connect without transfer to the current SkyTrain network at Lougheed Town Centre Station and will integrate with regional bus and West Coast Express networks. When the line opens, Metro Vancouver's SkyTrain system will become the longest fully automated rapid transit system in the world.
